

## SULPHUR GRANULAR

A fertilizer that provides plants with the essential nutrient sulfur in a granular form. Sulfur is a vital element for plant growth, as it facilitates the synthesis of amino acids, proteins, and vitamins in plants.

Appearance	Pastilles, pale yellow in color, sometimes grayish
Sulphur (S), min, %	99.95
Mass fraction of ash, max, %	0.02
Mass fraction of organic compounds, max, %	0.01
Mass fraction of acids, in recalculation on sulfuric acid, max, %	0.0015
Excess moisture, max, %	0.5
