

MAP 11-46

Monoammonium phosphate

Characteristics

| | |
|---------------------|------|
| Nitrogen (total), % | 11±1 |
|---------------------|------|

| | |
|------------------------------|------|
| Nitrogen in ammonium form, % | 11±1 |
|------------------------------|------|

| | |
|---|------|
| Phosphates, in conversion to P ₂ O ₅ , (total), % | 46±1 |
|---|------|

| | |
|--|-----|
| Sulphates in conversion to S, (total), % | 3±1 |
|--|-----|

| | |
|--------------|-----|
| Water, % max | 1.5 |
|--------------|-----|

Granulometry, granules diameter:

| | |
|--------------------|---|
| under 1 mm, %, max | 5 |
|--------------------|---|

| | |
|-------------------|----|
| 1 to 4 mm, %, min | 90 |
|-------------------|----|

| | |
|---------------|---|
| above 6 mm, % | 0 |
|---------------|---|

| | |
|----------------------------|----|
| Total of nutrients, %, min | 56 |
|----------------------------|----|

| | |
|---------------------------------------|---|
| Static strength of granules, MPa, min | 3 |
|---------------------------------------|---|

| | |
|---------------|-----|
| Friability, % | 100 |
|---------------|-----|
