

MAP 11-52

Monoammonium phosphate

Characteristics

Nitrogen (total), %	11±1
---------------------	------

Nitrogen in ammonium form, %	11±1
------------------------------	------

Phosphates, in conversion to P ₂ O ₅ , (total), %	52±1
---	------

Sulphates in conversion to S, (total), %	3±1
--	-----

Water, % max	1.5
--------------	-----

Granulometry, granules diameter:

under 1 mm, %, max	5
--------------------	---

2-5 mm, %,min	90
---------------	----

above 6 mm, %	0
---------------	---

Total of nutrients, %, min	56
----------------------------	----

Static strength of granules, MPa, min	3
---------------------------------------	---

Friability, %	100
---------------	-----
