

NPK

16-16-16-6 (S)

Characteristics

Nitrogen (total), %	16±1
Nitrogen in ammonium form, %	9.5±1
Nitrogen in the form of amide, %	6.5±1
Phosphates, in conversion to P ₂ O ₅ (total), %	16±1
Phosphates, in digestible form to P ₂ O ₅ , %	15±1
Phosphates, water-soluble to P ₂ O ₅ , %	14.5±1
Potassium, in conversion to K ₂ O, %	16±1
Sulphates, in conversion to S (total), %	6±1
Water, max, %	1.0

NPK

16-16-16-6 (S)

Characteristics

Granules diameter:

under 1 mm, max, %	5
2 – 5 mm, min, %	90
above 6 mm, %	0
Total of nutrients, min (total nitrogen, total phosphates, potassium (K ₂ O)), (exceeding of upper limits of total nitrogen, total phosphates, potassium (K ₂ O), total sulfates in conversion to S, is acceptable), %	47
Static strength of granules, min, MPa	3
Friability, %	100
Color	pink
